Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3636

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5,6,8-10,12,15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Oglesby.

See figures 1 and 2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4,7,13,14,16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oglesby in view of Uhl.

While the first and second legs of Oglesby do not form continuous loops, the patent to Uhl (figs. 1,2) teaches the use of an elongated member extending continuously from underneath the seat members on each side, forming a "continuous loop" with the leg members and the elongated lower member. In view of this suggestion, to have extended and joined the loop portions of each side member of Oglesby that supports the seat such that a continuous loop is formed,

would have been an obvious modification to one with ordinary skill in the art, thereby increasing the support and strength of the picnic table.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oglesby in view of Tseng.

To have provided the table of Oglesby with a pair of side rails that interconnect the cross bars of the table supports, would have been an obvious modification to one with ordinary skill in the art, as such is shown to be conventional by Tseng (fig. 2) thereby increasing the support for the table top.

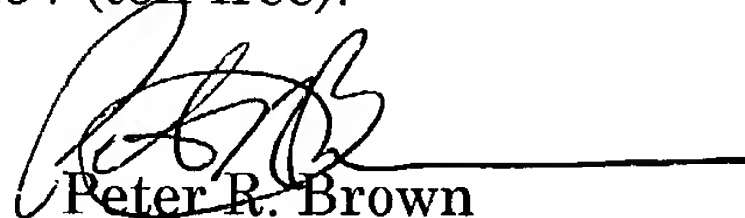

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Beller, Fox and Trubee show various features of the invention.
